### ***Internet Safety and Cyber-Bullying***

*Young people are faced with a unique situation regarding technology. Technology is expanding and becoming more advanced faster than any time in history. This rapidly developing field leaves new challenges for our children. Problems have developed that are unique to this time period thus far. Cyber-Bullying incidents are becoming more common, and the anguish it can cause is far reaching. Too many children and teens are being harmed by this cowardly practice. Internet Safety is also of concern because it can lead to a variety of problems. Internet safety encompasses everything from keeping personal information and passwords secure to social networking and safe communication with others online. Ethical decisions, personal safety, and personal responsibility are just some of the topics discussed in this presentation.*
